### MCR Labs Announces First Annual “Cannabis Science Fair,” Begins Accepting Submissions

*Cannabis researchers and innovators are invited to submit materials to be considered for inclusion in a science-fair-styled event at the Boston University BUild Lab on Dec. 11.*

**BOSTON, Mass.** – Massachusetts-based cannabis testing company MCR Labs will host the first annual “Cannabis Science Fair” at the The BUild Lab IDG Capital Student Innovation Center on December 11.

MCR Labs is partnering with The Cannabis Center of Excellence (CCoE) and Boston University to organize the event, which is billed as “an exhibition of research and progress from the institutions working to expand our cannabis knowledge.” Groups interested in showcasing their cannabis-based work at the science fair are invited to submit materials to MCR Labs via <http://mcrlabs.com/cannabis-science-fair>.

“We’re extremely excited about the potential for this event,” said Melissa Kenton, MCR Labs event and outreach coordinator. “It’s been on our radar for over a year, and we cannot wait to see what our fellow cannabis scientists and innovators are ready to share with us and with the community.”

Submissions for the Cannabis Science Fair will be assessed by MCR Labs’ Scientific Operations team and selected for inclusion based on the soundness of methodologies, their potential scientific or industrial impact, and how thoroughly their findings are presented. A limited number of submissions will be selected for full presentations, poster presentations, and demonstrations of any devices or prototypes.

Groups selected to exhibit at the Cannabis Science Fair and other details about the event will be announced in November. Sponsorship opportunities are available and the event will be free to the public. Donations and other proceeds will go to the CCoE and used to pursue future cannabis science explorations. Please contact MCR Labs for additional information.

**About MCR Labs:** MCR Labs is one of the longest operational cannabis testing laboratories on the East coast with facilities located in multiple legal cannabis markets in the Northeast. We are ISO/IEC 17025:2017 accredited providers of analytical cannabis product testing and R&D services committed to assisting licensed marijuana establishments, patients, researchers, entrepreneurs, and advocates. Our team of chemists and pharmaceutical scientists are dedicated to advancing public health and safety through leading-edge chemical analysis of cannabis products and offering unparalleled guidance and support for partners, regulators, and the communities we serve.
